About Me

I am an avid learner with an enthusiastic and diligent approach towards everything in life, hoping to learn every day. Design and travel are important to me, and inseparably entwined. Whereas design is where I unleash my creative self; travel provides the food for thought that allows me to lend a unique perspective to each and every work of mine through the paradigm of various experiences. I look forward to designing and developing applications that strike a chord with the world, and change it for the better in the slightest or strongest way.

Projects & Internships

June 2014 - July 2014
Beon Systems
Design Internship
Worked on branding as well as user interface design for the international e-commerce portal of the brand Paul Drish (https://pauldrish.com). Part of the design team for a purpose-built mobile operating system for foreign travellers named Trabug (http://trabug.com). Designed the web interface and logo for Jedi Labs (http://thejedilabs.com) and Air Ganesha (http://www.airganesha.com).

2014
TU 360 (College Virtual Tour)
Web Design & Development
Part of the technical development team that built the virtual tour of the Thapar University campus. The tour has been featured on the university's website.
Repository - https://github.com/abhijit-singh/tu360

2014
turbofixengineers.com
Web Development & Branding
Developed the website and brochure for a Chandigarh based company by the name of Turbofix Engineers & Consultants.
Website - http://turbofixengineers.com

2015
Peek-a-Boo Mobile Application
UI/UX Design
UX research and interface design for a music player application with enhanced music sharing capabilities for Android & iOS. The application is scheduled to be launched in December 2015.
Design - http://behance.net/gallery/29743631/PeekaBoo

2015
Touchless Interface with Leap Motion Device
Backend Development
Initiator and developer of an application that would allow users to interact with the operating system without touching any kind of hardware. The project uses a Motion Controller to detect hand movement & is implemented using FOSS libraries like pyUserInput.
Repository - https://github.com/abhijit-singh/touchless-leap

2014
Jazbaa.org
Digital Magazine & Web Development
Digital magazine with flippable pages developed using JavaScript along with the website overhaul for Mumbai based monthly youth magazine, Jazbaa.
Website - http://jazbaa.org/jazbaamag
Repository - https://github.com/abhijit-singh/jazbaa
